

Dehumidifier TD-C1410

Dehumidifier

EAN code	4963505829988
Colour	White
Capacity	10 L/day (30°C / 80% RH)
Max. power consumption	205 W (30°C / 80% RH)
Tank capacity	2.5 L
Suitable space	16 - 26 m ² / 40 - 65 m ³
Operation Temperature	7 - 35 °C
Air volume	105 m ³ /hr
Refrigerant	R 290
Unit protection	IPX 1
Dimension unit / carton	288 x 198 x 509 mm (W x D x H) / 314 x 223 x 532 mm (W x D x H)
Weight (net. / gross)	9.8 Kg / 11.0 Kg

Compressor type dehumidifier

The idea behind this unit is to have it dehumidify in an efficient way the whole season, so called localized dehumidification. This unit will keep on dehumidifying at maximum capacity between 7 - 35 °C. The unit will greatly enhance your personal comfort whether at work office, home or particular usage like cellar, boat, caravan. Furnishing, fabrics and clothes are kept in good condition, easy to dry your laundry, the unit creates dry air zone anywhere you need it.

Lightweight portable "esthetic & modern" design

The unit weighs only 9.8 kg, easy to handle, provided with built in handle, 4 hidden "multi-directional" castors makes the unit mobile and easy to transport. it has a unique, compact body.

Automatic operation

This unit is equipped with humidity sensor and adjustable humidistat, electronic control and led display, indicating the current room humidity level as well as the selected humidity level. it has a powerful maximum dehumidifying capacity of up to 10 l / 24hrs.

Anti bacterial / allergic air filter + active carbon filter

The new white clean design unit with delicate light grey and easy access "touch screen" operation panel, a built in handle for easy carrying and anti bacterial/ dust screen filter in combination with an active carbon filter to eliminate odours, which can easily be cleaned and in time even be replaced.

Quiet operation

The unit operates with a low noise level.

Low temperature operation + automatic defrost

When unit is running under the condition of 7°C ≤ room temperature ≤ 12 °C, it will be stopped automatically to defrost for every 30 minutes.

On/off-timer

The unit has an off-timer function which can be selected from 2 hrs. to 24 hrs.

Energy efficient + environment friendly

The unit features low power consumption and uses environment friendly refrigerant R290.

Top air louvre outlet:

The unit has a top air louver outlet, with a wide 180 degrees angle, which makes it easy to dry your laundry.

Big size water tank (2.5 liter) + full tank indicator

the big water tank of 2.5 liters will minimize the numbers of drainages per day. it can easily be taken out from the backside. when the drainage tank is full, the tank "full" indicator led light will turn on to alert the user.

Continuous drainage option

In case of a more permanent setting, you can easily connect a permanent drain tube into the unit straight to the sink. especially when the unit will be installed at a higher level against the wall this permanent drain will be highly effective. a plastic tube (2 m) is delivered inside the box as a standard accessory.
