**NEW  
TECHNOLOGY**  
efficient at low  
temperature

## Desiccant Type Dehumidifier

<b>EAN code</b>	4963505828493
<b>Colour</b>	White
<b>Capacity</b>	8 L/day
<b>Power consumption (min./max)</b>	250 W / 620 W
<b>Tank capacity</b>	4.0 L
<b>Suitable space</b>	15 - 25 m <sup>2</sup> / 37 - 75 m <sup>3</sup>
<b>Operation Temperature</b>	1 - 40 °C
<b>Dimension unit / carton</b>	350 x 240 x 506 mm (W x D x H) / 398 x 282 x 570 mm (W x D x H)
<b>Weight (net. / gross)</b>	7.2 Kg / 8.3 Kg

### Desiccant type dehumidifier

This model features a desiccant wheel instead of a rotary compressor, it will keep on dehumidifying at maximum capacity even below an ambient temperature of 15°C. Ideal for cellars, garages, caravans, boats, storage rooms. No compressor, no harmful refrigerant gas

but low noise during operation.

### Dew condensation preventing mechanism

Humidity sensor controls room humidity from 45% to 50% automatically to prevent dew condensation on the wall and window.

### Automatic operation

This unit is equipped with humidity sensor and room humidity is controlled automatically at 45% - 50%.

### Laundry mode

Laundry mode can make dry rapidly the hanged laundry in the room. you can select turbo mode or saving mode depending your laundry amount.

### Auto swing air louvre outlet

The unit has a top air louver outlet, with a wide 180 degrees angle, which makes it easy to dry your laundry or have it even blown downward for floor drying. the louver has a 3 automatic swing setting, wide - up or front.

### Unique design, compact body & lightweight

Model TD-ZB80 has a unique compact design and is also lightweight and easy to carry (7.2 kg). a new feature are the two lateral air intakes, which enables the unit to put it close against the wall, very convenient for smaller rooms.

### Auto - restart function

In case of a power failure the unit will stop of course, but when power is on again, the unit will start automatically regaining its former settings.

### Big size water tank (4.0 liter)

The big (lateral) water tank of 4.0 liters will minimize the numbers of drainages per day (max. 2 times / 24 hrs), it can easily be taken out from the side, once the unit is put straight against the wall. The water tank has a built in handle and a cover to prevent the watertank to spill water during handling. In case of a more permanent setting, you can easily connect a permanent drain tube into the unit straight to the sink. Especially when the unit will be installed at a higher level against the wall this permanent drain will be highly effective.

### Anti bacterial / allergic air filter

The new white clean design unit with delicate silver plating is also equipped with an easy access operation panel (different automatic preset programs), a built in handle for easy carrying and anti bacterial filter which can easily be cleaned and in time even be replaced.

### Off-timer

The unit has an off-timer function which can be selected from 2 hrs. to 4 hrs. or 8 hrs.
